

## QUALITY AND ENVIRONMENTAL POLICY

UVE 2003, S.L. is a company dedicated to the recovery of ferrous and non ferrous materials and to the waste transfer. UVE 2003, S.L. has the goal of providing a comprehensive service which complies with our commitment to our customers and to the quality of the service performed.

At UVE 2003, S.L. we are aware of the incidence we have on our surroundings, as well as the importance of the processing of materials following the highest criteria for quality, in order to improve the satisfaction of our customers and society at large. That is why we commit ourselves to developing our activity with protection and respect for the environment.

In order to ensure these results, and always within the framework of continuous improvement, we have based our Quality and Environmental Policy on the following principles:

- Recovering most of the valuable fractions of the treated materials, ensuring that the end waste is kept to a minimum.
- Improving the satisfaction of the parties concerned through the continuous improvement of our Quality and Environmental Management System, through the fulfilment of its requirements and expectations.
- Improving customer and supplier relationships, in order to increase the competitiveness of our company, ensuring our consolidation and development, and enhancing the quality of our products and services.
- Complying with the regulations concerning our operations and our products, whether they are made by our customers or they are of a binding nature, and maintaining a continuous monitoring of their evolution. Complying also with all the requirements we undertake voluntarily.
- Exercising control over our suppliers and subcontractors so that they do not interfere in the quality of our products or services, promoting environmental protection and, to the extent possible, improving their results.
- Minimizing the actual or potential impact of our activity on the environment.
- Developing and improving the present activities by placing emphasis on energy savings and natural resources, as well as on the minimizing of solid, liquid and gaseous effluent wastes generated, as a pollution prevention philosophy.
- Contributing with the necessary human and material resources to guarantee that the training of personnel in the areas of Quality and Environment results in the proper implementation of the established procedures and instructions and the awareness about the importance of their operations in the process of continuous improvement and prevention of environmental pollution.
- Informing the company staff about the Policy, so it is understood by all, as well as suppliers and any other group or individual who may be involved or interested.
- Constantly reviewing the Policy and the established improvement goals to ensure that they are appropriate for the continuous improvement process of the Management System in place and the environmental performance of UVE 2003, S.L.
